Type in description here

Evaluation Criteria

The four criteria below will be given equal consideration in judging. That is,

| | |
|----------------------------------|------------|
| 1 – Leadership | 25% |
| 2 – Market transformation | 25% |
| 3 – Communication | 25% |
| 4 – Other Benefits | 25% |

Notes to accompany this section of the form are available from www.seda.nsw.gov.au/ggawards.asp

Section One **Leadership**

Describe how the product /project /activities demonstrate leadership in your industry sector under the following two categories:

Type in description here

Section Two **Market Transformation**

How has your product/project/activities transformed the existing market for energy and water related goods and services made low emissions initiatives or alternative supplies of water competitive?

Type in description here

Section Three **Communications**

Provide a list (in point form) of any activities undertaken to communicate the commercial and environmental benefits of the project /product or activity and promotion to the target market and/or the energy or water sectors. Alternatively, attach a plan/strategy for future communications activities.

Type in description here

Section Four **Other project benefits**

Aside from the project's greenhouse or water efficiency benefits, describe the indirect benefits of the project/product or activity, such as raising the industry profile, improving standards or industry best practice or job creation.
